Geographical Indications in the EU

• Lima, 28-29 March 2019
EU Policy on Geographical Indications (GIs)

• Part of the EU’s Common Agricultural Policy (CAP) - diversification of agricultural production, considerable benefit to the rural economy and society, impacting positively on biodiversity, improving income of farmers, retaining rural population, ...

• Development of a Quality Policy aiming at farmers and consumers

• EU’s legal framework / Support through CAP / Promotion

  • In Europe: early 20th century (e.g. AOC France)
  • At EU level: specific labelling rules on agricultural products in the late 70’s; specific legislation on spirits with Regulation (EEC) No 1576/89; first comprehensive regulatory framework on agricultural products and foodstuffs GIs in 1992 (R. (EEC) No 2081/92)
GIs in the EU

• **Agricultural products and foodstuffs**
  (cheese, meat, beer, bread, pastry, cork, flowers, leather, ...) –
  Regulation (EU) No 1151/2012

• **Wine**
  (grapes exclusively from the geographical area where the wine is made or at least 85% -
  Regulations (EU) No 1306/2013 and No 1308/2013)

• **Spirits / Aromatised wine**
  (Rum, Whisky, Grape marc, ... / Glühwein, Sangria, Vermouth, ... -

Evolution of PDO/PGI Food Registrations – (August 2018)
EU GIs: what is in for producers

- **Name is reserved** to products respecting the specification
- **Production is kept** in the geographical area
- Collective right, name is not reserved to one single producer, but can be used by all producers respecting the specification
- **Administrative protection** by Member State public authorities for EU wide protection
- Differentiation on the market allows often a better price
- Group organisation with a great potential for better division of the added value along the food chain
Value premium

The premium a GI can expect from the market, compared to non-GI products

→ on average, the price of a GI product is 2.23 times the price of a comparable non-GI products

Value premium rate in the EU27 by scheme

//\ does not reflect value added and profitability of the GI schemes as it does not take into account the additional cost of compliance with GI specifications
Value premium

“This study confirms a significant positive effect of GIs on price, regardless of the type of product, the region of origin, and whether the GI is long-established or recently registered. ... In most cases, the premium is between 20 and 50 percent.”

Strengthening sustainable food systems through geographical indications. An analysis of economic impacts – FAO / EBRD, 2018
EU GIs: sales value

• Estimated **sales value** of EU GIs: €62 billion in 2017
  = 5.7% of €1,098 billion (EU food and drink sector)

• Estimate of EU GI **exports value**: €15 billion in 2017
  = 15% of €102 billion (EU food and drink exports)
Frauds

• **Study carried out by EUIPO** (2015-2016) in 17 Member States, approximately 82% of the EU GI product market: 100,000 products checked for GI compliance

• The **value of GI infringing products in the EU** was approximately € 4.3 billion in 2014, which is approximately 9.0% of the EU GI product market.

• **Consumer loss**, defined as the price premium unjustly paid by consumers in the belief that they are buying a genuine GI product, is estimated at up to €2.3 billion, representing approximately 4.8% of total GI product purchases.

EU GIs: role of groups of producers

- **Application process**
  (... may only be submitted by groups who work with the products – Art. 49 R. (EU) 1151/2012)

- **Product**
  (... ensuring quality, reputation and authenticity, market monitoring - Art. 45 R. (EU) 1151/2012)

- **Legal protection**
  (ensure adequate legal protection, intellectual property rights – Art. 45 R. (EU) 1151/2012)

- **Promotion**
  (develop information and promotion activities, communicate value-adding attributes to consumers - Art. 45 R. (EU) 1151/2012)

- **Compliance**
  (develop activities related to ensuring compliance of product with specifications (not in replacement of Official Controls) – Art. 45 R. (EU) 1151/2012)

- **Development**
  (improve performance of the scheme, economic expertise, advice to producers – Art. 45 R. (EU) 1151/2012)
EU GIs: what is in for consumers

- Guarantee on the:
  - **Origin of the product**
  - **Quality of the product** (specification)
  - **Authenticity of the product** (no imitation)
- Ensured by **controls on production site and on the market**
- Quality designations **prevent the standardization** of products and offer a **wider choice to consumers**
Factors influencing Europeans’ food product purchases

QC13 How important or not are the following factors in your decision to buy food products? (% - EU)

- They respect local tradition and “know-how”
  - Very important: 31
  - Fairly important: 46
  - Not very important: 15
  - Not at all important: 5
  - Don't know: 3

- They have a specific label ensuring the quality of the product
  - Very important: 33
  - Fairly important: 43
  - Not very important: 15
  - Not at all important: 6
  - Don't know: 3

- They come from a geographical area that you know
  - Very important: 31
  - Fairly important: 44
  - Not very important: 17
  - Not at all important: 6
  - Don't know: 2

Labels identified by consumers:

- Fairtrade
- Organic
- PDO
- PGI
- TSG
EU GIs – Benefits Society

• Secures more of the added value processes in local areas:
  • Maintain jobs in (often) remote areas
  • Maintain economic activities in rural communities
  • Lead potentially to job creation
EU GIs – Benefits Society

- GIs encourage the preservation of:
  - Biodiversity (local races, varieties)
  - Local savoir-faire and traditional methods
  - Landscapes → tourism
EU GIs – controls / enforcement
(Regulation (EU) No 1151/2012)

- EU Official Controls
  - EU Member States Competent Authorities – possibility to delegate to accredited control bodies
- Prior to placing on the market
  - Verification that a product complies with the corresponding product specification – any operator that uses the name is part of the control system
- Market Controls
  - Surveillance based on risk analysis
EU GIs support and promotion

(Six EU priorities – Priority 3 related to Quality Schemes: new participation by farmers and groups of farmers in quality schemes – (e.g. certification costs)

• Annual promotion programme (calls for proposals – co-financing) – 2019 programme

(proposals from organisations in one Member State, several Member States, focusing on EU’s internal market or Third Country markets - Information provision and promotion programmes aiming at increasing the awareness and recognition of Union quality schemes (PDO, PGI, organic, ...)

• Through Trade Agreements

• IPKEY initiative
GIs success stories

Ireland

Waterford Blaa / Blaa

Conservation of local, cultural heritage and traditional production method

Registered in the EU since 19 November 2013
It is a white bread roll with white floury top
Ireland

Waterford Blaa / Blaa

Conservation of local, cultural heritage and traditional production method

The tradition of baking ‘Waterford Blaa’ dates back to the arrival of the Huguenots, they introduced a bread product in the late 17th century. It is believed that it was called ‘blaad’ or ‘blanc’, and quickly gained popularity.

The product is baked for longer, producing a stronger crust which contains the distinctive malt flavour (...) is made with traditional techniques (handling, flouring, hand flattening and baking process)

The link is based on reputation
## GIs success stories

### Ireland

**Waterford Blaa / Blaa**

The blaa is a key part of Waterford identity and as late as the 1950s and 1960s, there was a blaa bakery boom in Waterford, with about 15 bakeries making blaas in the city at the time.

**Today, there are only a couple, family run bakeries** in Waterford

**Expansion?**

To gain national and international recognition for the blaa, a local company saw an opportunity to combat the recession and now is selling frozen blaas to hotels and restaurants around Ireland and to an Irish pub in Paris

GI protection gave a major boost
A causal link exists between both the reputation and the quality of the specific product and its geographical origin.

Pepper cultivation in Cambodia is a 700-year old tradition. Kampong Cham and Kampot provinces are the most important Cambodian pepper plantation area due to the excellent soil and climate conditions.
GIs success stories

Cambodia

Price boosted after EU registration
Operators/families/producers doubled in 4 years
Production doubled in 4 years (70% export)
Positive impact on image of the territory (tourism)

Kampot Pepper
EU GIs – looking ahead

• **New Regulation on spirits GIs**
  (Subject to formal approval; GI register, relationship GIs/TMs, controls, goods in transit – expected May 2019)

• **New Common Agricultural Policy package including amendments to agri-food and wine GIs**
  (Part of the wider EU’s CAP reform: simplification and modernisation (shortening/harmonising procedures, ensuring a better division of tasks among national authorities and Commission, harmonisation of definitions, strengthening controls/antifake (on-line platforms, customs) – expected to apply from 2021)

• **Lisbon Agreement – Geneva Act adhesion**
  (EU Institutions Political Agreement reached March 2019 – formal agreement pending - expected possibility to start negotiations in 2019)

• **Cooperation with EUIPO**
  (GIview, relation GI/Trademarks, IPKEY initiative)

• **Update 2013 study on value of EU GIs**
  (Study on economic value of EU quality schemes, geographical indications (GI) and traditional specialities guaranteed (TSG) – expected in 2019)

• **Evaluation of EU policy**
  (Overall on GIs and TSGs – expected Q4 2020)
Thank you!
