I. Rules on Mediation and Disputes’ settlement in EU Directives
Under the Cable & Satellite Directive 93/98/EEC all EU MS are obliged to ensure there is a mediation procedure for solving conflicts regarding the authorization for the cable retransmission of broadcasts.

**Article 11. Mediators**

- 1. Where no agreement is concluded regarding authorization of the cable retransmission of a broadcast, Member States shall ensure that either party may call upon the assistance of one or more mediators.
- 2. The task of the mediators shall be to provide assistance with negotiation. They may also submit proposals to the parties.
- 3. It shall be assumed that all the parties accept a proposal as referred to in paragraph 2 if none of them expresses its opposition within a period of three months. Notice of the proposal and of any opposition thereto shall be served on the parties concerned in accordance with the applicable rules concerning the service of legal documents.
- 4. The mediators shall be so selected that their independence and impartiality are beyond reasonable doubt.
Article 34. Alternative dispute resolution procedures

1. Member States may provide that disputes between [1] collective management organisations, [2] members of collective management organisations, [3] rightholders or [4] users regarding the provisions of national law adopted pursuant to the requirements of this Directive can be submitted to a rapid, independent and impartial alternative dispute resolution procedure. (Internal numbering and emphasis added.)
Dispute Settlement Mechanisms in Directive 2014/26/EU

Dispute resolution for members and right holders:

- Member States shall ensure that CMOs make available to their members and right holders effective and timely procedures for dealing with complaints and for resolving disputes in particular in relation to authorisation to manage rights and termination or withdrawal of rights, membership terms, the collection of amounts due to right holders, deductions and distributions (article 33).

Dispute resolution for users:

- Member States shall ensure that disputes between CMOs and users concerning the existing and proposed licensing conditions, tariffs, and any refusal to grant a license can be submitted to a court, and if appropriate, to an independent and impartial dispute resolution body (mediation or arbitration) (article 35).
- On the other hand, due to specificities of multi-territorial licensing, the proposal foresees the submission of related dispute to alternative dispute resolution bodies (such as arbitration). This does not prevent parties from going to courts. (article 34 par. 2).
II. COPYRIGHT TRIBUNALS; THE U.K COPYRIGHT TRIBUNAL AS AN EXAMPLE
Background

Originally established under the Copyright Act 1956

Jurisdiction and powers substantially expanded and name changed in Copyright Designs and Patents Act 1988, as amended
Jurisdiction

- Primarily adjudicates commercial licensing disputes between collecting societies and business users of copyright material i.e. it determines the terms of/ remuneration under collective licensing schemes.
Jurisdiction

Covers both existing licensing schemes and proposed new licensing schemes.

But there must be either an existing scheme or a proposed scheme. No power to require a copyright owner or collecting society/licensing body to propose a scheme or licence.

No copyright owner required to join a collecting society.
Although most cases concern collective licences, Tribunal has jurisdiction over some other matters e.g. licences of right.

Jurisdiction includes:
- Performance rights
- Database rights
- Lending rights (for certain works)
- Publication rights

(in addition to copyright)
Orphan Works Jurisdiction

Appeal to Copyright Tribunal from IPO decisions:
- From applicants in UK scheme in relation to
  - refusal to grant a licence
  - level of licence fee
  - licence terms
- From reappearing rights holders if failure to agree fair compensation

Appeal to First Tier Tribunal for reappearing rights holders claiming:
- IPO as authorising body acted improperly
- IPO as authorising body failed to comply with its obligations under the regulations
No Jurisdiction

- No jurisdiction on copyright infringement
- No investigatory jurisdiction
- No jurisdiction to deal with complaints by members of collecting societies who have issues with the collecting society of which he/she/it is a member
- No jurisdiction to deal with Collecting Societies' codes of practice
Small Claims

- In 2010 new Rules of Procedure introduced which included Small Applications track of £50,000 limit
- Rules set process for dealing with applications, hearings etc. and procedures are in line with English Civil Procedure Rules
- Overriding objective is to deal with cases justly and focus is on efficiency/cost effectiveness
- Case management conferences/directions are common
Procedure

Proceedings started when person files the application form (the same for all applications), a statement of grounds and pays the relevant fee.

Chairman must decide whether to allocate to small or standard applications track.

Small track – usually no case management conference or oral hearing.

If allocated to small track, Tribunal obliged to give directions and set date for its decision.
Respondent has 28 days to file response to include concise facts and relief and directions sought

Applications must be advertised

Under Rule 15(1) any person with substantial interest in outcome may, within 28 days, request to intervene

Tribunal must invite and consider observations of parties in deciding whether to give permission to intervene
Procedure and Powers

Tribunal has power to reject an application (on certain grounds and after giving parties opportunity to be heard)

Tribunal can give directions to remedy defects in application, response and/or interventions
One Chairman and two deputy Chairman with legal qualifications and experience

Up to eight non legal members with commercial experience

Appointments are on a renewable 5 year basis

Tribunal sits with a Chair or deputy Chair and two lay members

Decisions by majority vote

Tribunal is administered by a Secretary, who is a civil servant working in the UK IPO
• Non legal members provide commercial input. They come from a variety of backgrounds – e.g., retired publisher, Chartered Accountant, magistrate in criminal court.
Criteria for setting tariff and other terms

Most references require the Tribunal to determine the royalties or tariffs payable and other key terms under the licence

Terms must be reasonable in the circumstances

Statutory and case history guidance given to Tribunal as what must be taken into account when considering the reference of a licensing scheme.
• In essence, the Tribunal must consider comparable licences (where available), and ensure there is no unreasonable discrimination between licensees or prospective licensees under the referred scheme and licences under other comparable schemes.

• May discriminate between licensees where reasonable basis to do so.
Criteria for setting tariff and other terms

- In assessing the proper tariff Tribunal must have regard to the principle is that the rate is that which would be negotiated between a willing licensor and a willing licensee.
Orders of the Tribunal

- Order can be backdated to date of application or date scheme came into force if later.
- Tribunal has power to award interest.
- Where licence due to expire, licensee may apply for a continuation on basis that it is unreasonable that it should cease to be in force.
- Application may not be made before last 3 months of the licence and licence remains in force until conclusion of proceedings.
General

- Parties often legally represented but this is not a requirement and parties may present their own cases.
- Hearing are usually in public and transcripts are taken.
- Oral evidence (cross) is usually taken only from people who have supplied written evidence.

Costs are not automatically awarded but Tribunal has discretion to award costs at any stage of the proceedings.
Decisions must be in writing

Appeals on points of law only to single judge in High Court in England and Wales and Court of Sessions in Scotland
Cases Handled by the UK Copyright Tribunal

- Not many cases are referred to the CT. Since 2010 when new Rules were introduced CT has determined only 7 substantive cases - approx. 1 per year. Probably indicates the market works reasonably well as few disputes

- Some cases involve preliminary or procedural hearings as well

- 2 cases in 2018 before the CT - more than usual

- Although CT has jurisdiction over a number of matters, all cases since 2010 have involved determined the financial and other terms of a collective licence. The key issue is always the amount to be paid for the licence.
• A number of cases are started in the CT but are settled before getting to hearing stage e.g. In a case I am currently hearing the parties have jointly requested 2 lengthy extensions to allow parties to continue to negotiate and either resolve matter entirely or reduce the number of issues.

• CT encourages negotiation and settlement.

• Consequently the cases that are determined the CT tend to be big - i.e. worth many £millions - and complex as the decision often affects either an entire industry or a large number of copyright works or both.

• Small applications track is rarely used.
