GIs ECONOMIC DATA: A STRATEGIC ELEMENT TO TACKLE FOOD FRAUDS

THE VALUE OF MADE IN

**The impact of agro-food in
 Italy:**
 12% of GDP
 2° economic sector
 +48% export in 10 years

THE ITALIAN AGRO-FOOD SYSTEM

Total value: 140 mld €

Number of farms: 720,000

Agro-food companies: 56,000

Geographic Economy

In contrast to the global economy, a Geographical Economy is gaining more and more strength, which has as its driver the origin of the product that leverages the made in

GEOGRAPHICAL INDICATION

In this context, the concept of geographical indication links production to territories and protects them in the free trade of goods.

THE ITALIAN MODEL

It has established itself as a successful economic model, developed with public policies and participation of the supply chain, with a network system implemented to protect and innovate the unique and distinctive heritage

abroad**

5 PILLARS OF GIs' SYSTEM

1. Companies

- ✓ Cohesion of the production system
- ✓ Different business approach

2. Institutions

- ✓ Knowledge and best practices experience
- ✓ Common Projects and activities

3. Specification

- ✓ Sharing of the first drafting
- ✓ Dynamism and updating capacity

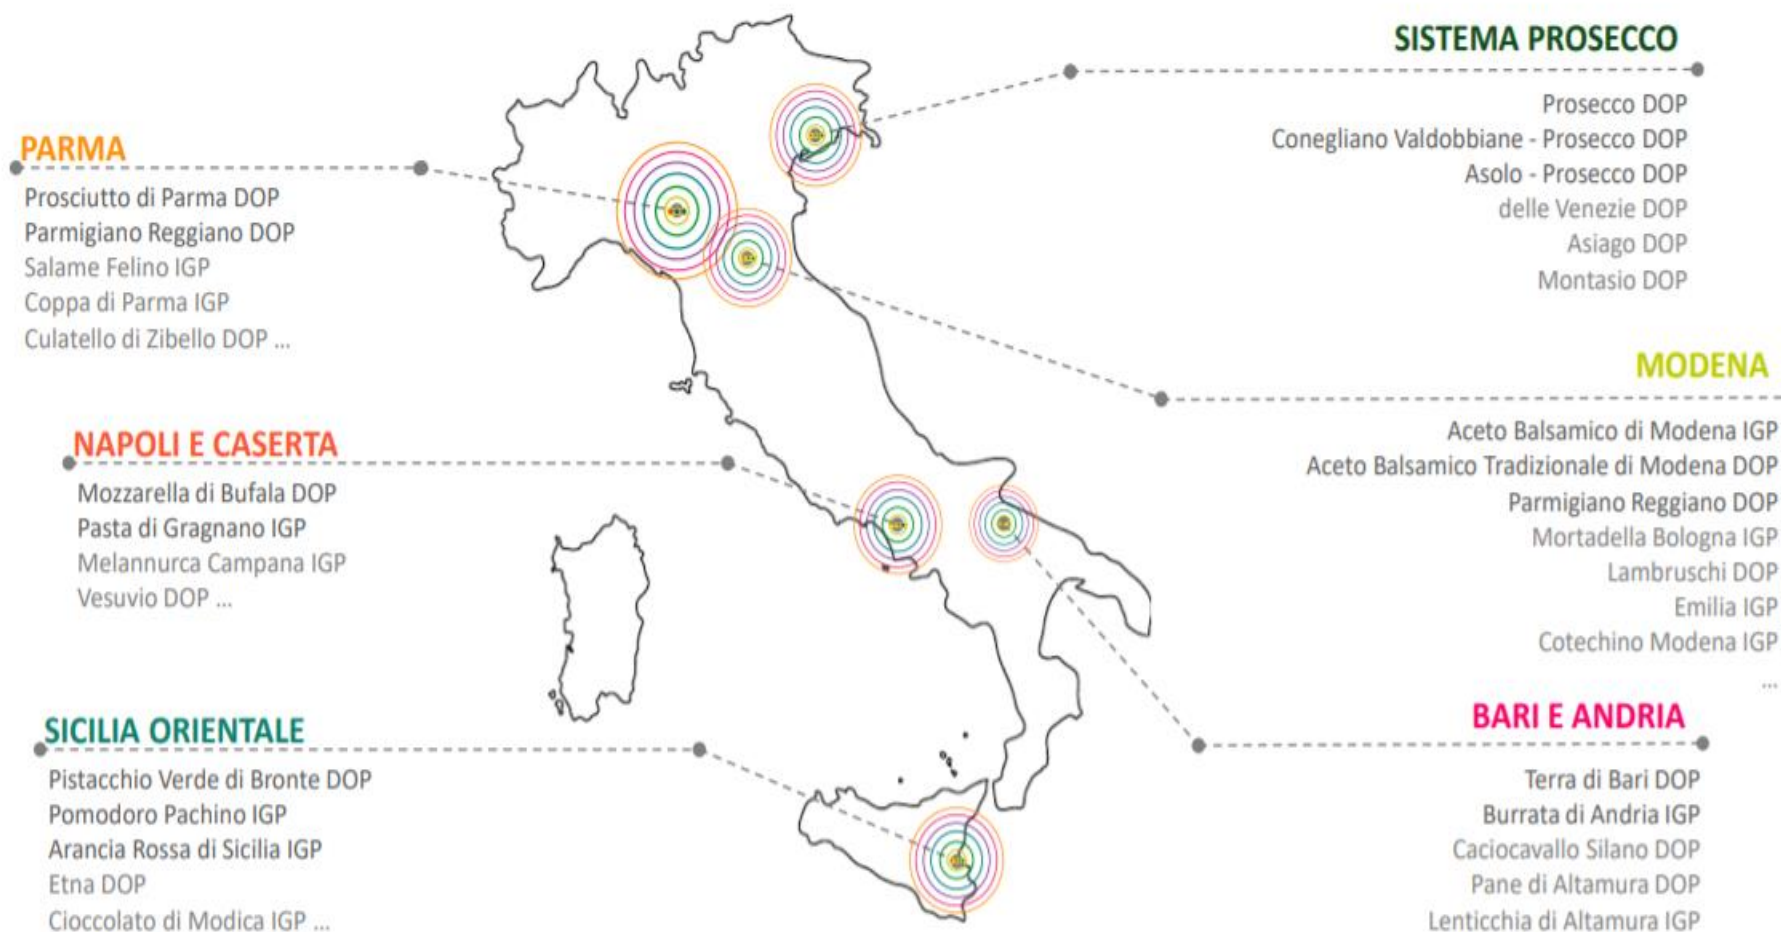

4. Controls

- ✓ Very strict control plan (which is authorised by the Public Competent Authority)
- ✓ Efficient and effective functioning of the Public Control Authority (which carries out market controls)
- ✓ Efficient and effective functioning of the Control Body (which carries out the certification controls)

5. Producers Association

- ✓ Protection in cooperation with the Competent Authority
- ✓ Promotion
- ✓ Network between the associated operators
- ✓ Governance

MAIN GIs' ECONOMIC HUBS IN ITALY

IN SUCH RELEVANT ECONOMIC CONTEXT GIs' PROTECTION AND THE ROLE OF COMPETENT AUTHORITY IS STRATEGIC

IN ITALY ICQRF (DEPARTMENT OF CENTRAL INSPECTORATE FOR FRAUD REPRESSION AND
QUALITY PROTECTION OF AGRI-FOOD PRODUCTS) IS THE COMPETENT AUTHORITY FOR
PROTECTING GIs AS WELL AS CONVENTIONAL AGRO-FOOD PRODUCTS

INDEED

ICQRF is: The Law Enforcement Body of the MIPAAF (Italian Ministry of Agriculture,
Foodstuff and Forestry Policies) responsible for preventing and repressing any breach of
European and Italian laws relating to:

- *agri-foodstuffs productions, (from farming to food processing industries as well as at
their wholesale and retail stage);*
- *farm supply products (seeds, feed, agricultural chemicals, fertilizers and plant growth
products).*

THE ITALIAN EXPERIENCE IN THE GOVERNANCE OF THE INSPECTION ACTIVITIES TO CONTRAST FOOD FRAUDS

ICQRF ON THE SPOT CONTROLS

Carring out **Official Controls** according to **Reg. (EU) No. 625/2017** (by means of Inspections, Chemical Analyses and, if the case, working as Police under the coordination of a Public Prosecutor).

Imposing monetary or other **sanctions** as result of inspection or analyses findings

Authorizing private or public control bodies for certificating foostuffs as PDO, PGI and Organic.

Supervising the activities of the aforementioned private or public control bodies.

Head of ICQRF

At central level, the Department consists of two Directorates-General.

At local level, it has 10 decentralised inspection offices and 19 local units.

ICQRF has also its own laboratories network, comprising 6 chemical laboratories, all accredited

- 10 Uffici territoriali
- 19 Uffici d'area
- 6 laboratori di analisi

Cooperation between different EU Competent Authorities as the main tool to tackle fraud

At EU level, ICQRF, as Food Fraud Contact Point (FFCP), operated 94 interventions in 2019, 76 of which were reported by other Member States and 18 by Italian initiative. The 18 requests for Administrative Assistance and Cooperation (AAC) promoted by Italy concerned:

- 8 cases of Greek virgin olive oil sold as extra virgin oil;
- the case of evocation of the "Rhosecco Sec" wine produced in Rhodes, evocative of Prosecco DOP;
- Norwegian processed meat products labeled and advertised through names, indications and images that suggested an Italian origin of the product (Italian Sounding);
- "Chianti Denomination of controlled and guaranteed origin 2016", bottled by an Italian company, to which a Romanian label has been added containing deceptive indications ("Prosecco" and "brut sparkling wine");
- at a German bottler, verification of the conformity of the bottled Montepulciano d'Abruzzo DOP consignments;
- Australian Manuka honey, packaged in Great Britain, irregular test result due to the presence of hydroxymethylfurfural values and diastatic activity different from the limits allowed by the European standard;
- extra Spanish red fruit jam "in season" with voluntary information on the label not verifiable;
- the marketing, in South Korea, of sparkling wine produced in Spain but labeled with indications in Italian;
- organic rice from Greece and intended for Italian, French and German companies, without the actual origin on the accompanying documents;
- requested opinion to Greece for the denomination "Konservolia Stylidas DOP".

76 reports made by other EU Member States, including 46 requests for Administrative Assistance and 30 Food Fraud. Twelve cases related to the OPSON VIII operation on organic products launched by DG SANTE in 2018.

Bad Juice Operation

At the end of June, investigations by the Public Prosecutor's Office of Pisa made it possible to execute **9 orders of pre-trial detention in prison and to seize 6 companies, real estate and mobile assets for a total value of over € 6,500,000.**

During the operation, **1,411 tons of juices, jams and canned food adulterated and falsely designated "as organic products"** were seized for a value of **€ 4,850,000.**

The intense investigation activity was carried out by the inspectors of the ICQRF and of the Economic and Financial Police Unit of the Guardia di Finanza (GdF) of Pisa. The activities allowed to vanquish a criminal association aimed to the illicit production and marketing of concentrated apple juice, sophisticated with water and sugars and falsely declared organic whit European origin.

The sophisticated product was obtained from companies formally located in Serbia and Croatia, but in fact managed directly from Italy by two brothers from Pisa. These two entrepreneurs, placed at the top of a criminal association, could count on the active collaboration of their employees and other foreign people, each of them playing a specific role in the fraud chain.

With consolidated and tested methods, the fraudster team has produced and marketed large quantities of sophisticated and NON-organic apple juice in the territory of the European Union. Thanks to the cooperation of Croatian companies that provided customs clearance for the product obtained in Serbia, countless false documents were produced aimed at legitimizing (only on the "paper") the false nature, quality and declared origin of the product.

The meticulous investigations have made it possible to demonstrate that the apple juices obtained in Serbia were illicitly produced from fruits:

- not suitable for human consumption as they were deteriorated or in an advanced state of decomposition, also due to the high presence of mycotoxins;
- contaminated with chemicals not allowed in organic farming (fungicides, insecticides and herbicides).

“GHOST WINE” Operation

In details:

1. Upon a request of the local Public Prosecutor's Office, the Judge ordered the application of 11 orders of pre-trial detention, 6 in prison and 5 under house arrest, as well as the preventive seizure of 4 companies and the execution of 62 searches towards entrepreneurs, operators in the wine sector and companies operating in the regions of Puglia, Campania, Lazio and Abruzzo.
2. Over 300,000 hl of wine products were seized, included the four seized companies, the value of the blocked assets is around 250 million euros.
3. The investigation activity, coordinated by the Public Prosecutor of the Republic of Lecce, resulted in discovering an illicit commercial system, managed by three associations, in some respects complementary to each other, insistent in the province of Lecce.
4. The commercial system put in place made it possible to obtain a low-cost wine product subsequently marketed as a quality or even organic product, PDO or PGI. In particular, was highlighted the ever-present practice of alcoholic fermentation of mixtures of sugars obtained from sugar cane and beet. These mixtures of sugars were illicitly marketed in favour of well-known and important Italian companies operating both throughout the country and abroad.

“GLOBAL WINE” Operation

- ✓ ICQRF inspectors carried out 21 searches ordered by the Public Prosecutor’s Office at the Court of Foggia at processing facilities and marketing enterprises of wine products. The complex investigation activities were coordinated and directed by the Public Prosecutor of Foggia and carried out jointly by the Carabinieri NAS of Bari and by the inspectors of the local ICQRF South East.

THE INVESTIGATIVE HYPOTHESIS CONCERNS

- ✓ *The fraudulent use of table grapes transformed into musts to produce wine products.*
- ✓ *These products have been subjected to fictitious movements from Puglia to Sicily, to finally reach some Emilian facilities, where they were used to produce vinegar and derivatives of well-known brands.*
- ✓ *A plant in the area of Foggia, thanks to the work of intermediary and transport companies, sold hundreds of tons of musts by using transport documents for wine products falsely certifying the quality of the product and the origin of the grape*
- ✓ *In details, in the document the reported musts origin was from grapes wine Trebbiano and Sangiovese, suitable to produce Balsamic Vinegar of Modena, while they were musts of dubious origin and provenance and / or obtained from table grapes.*
- ✓ *The same documents also indicated a place of loading different from the actual one, corresponding to the premises of the processing plants of table grapes in the south-east of Bari. The counterfeiting of the product was then completed by a Salento company which, after further sophistication operations, put the musts back on the market and destined them for vinegar companies, currently unrelated to the illegal activity*

Results

The operation led to the seizing of 9,100 tons of musts and wine products for an approximately value of 15 million euros, as well as a huge number of commercial documents useful to keep going with the investigations.

OLIVE OIL SECTOR “CROCE E DELIZIA” Operation

The operation, which started from previous ICQRF investigations, has been coordinated by the Public Prosecutor Office of Florence. The ICQRF inspectors and the Carabinieri NAS have dismantled a criminal organization, which managed the commercialization of large quantities of seeds oil, marketed as extra-virgin olive oil. This fraudulent activity has been carried out through the addition of colouring substances (mainly chlorophyll and beta-carotene).

The results of investigation were:

- the home detention of 2 persons accused of money-laundering and receiving stolen goods;
- the ban to carry out entrepreneurial activities in the food-trade for 6 months.

The fake extra-virgin olive oil (which was not harmful for the public health) has been produced in Apulia and has been placed on the Tuscany commercial circuit (restaurants, bars, bakeries, food wholesales).

During the investigation 16 tons of counterfeit oil, put and sold in 5 litres cans, has been seized.

FRUIT AND VEGETABLE SECTOR“PIENNOLO” OPERATION

In November, officers of the ICQRF Italia Meridionale Office detected the selling of “*Pomodorino del Piennolo del Vesuvio PDO*”, whose geographical origin was unknown. This crime was perpetrated by a company, which was out from the PDO certification scheme since 2019. However, the company management used authorized packages, with labels and batch numbers referring to the year 2018 (year in which the company was still in the above-mentioned certification scheme).

The selling of irregular products was made by using the Web: specifically with advertisements on the website www.ebay.it. The advertisements were promptly removed as consequence of the ICQRF report.

Furthermore, people responsible of such illegal activity have been reported to the Public Prosecutor Office of Naples. The search carried out by ICQRF officers (after the prosecutor’s delegation) allowed to seize all the administrative documents and to highlight that online sales were made by a former partner of the company.

THE GOVERNANCE OF INSPECTION ACTIVITY:

**ICQRF NEW ACTIVITIES TO CONTRAST FOOD
FRAUDS FOR PDO/ PGI PRODUCTS AND THE SO-
CALLED “ITALIAN SOUNDING”.**

Agri-food “Made in Italy” protection in the world and on the web

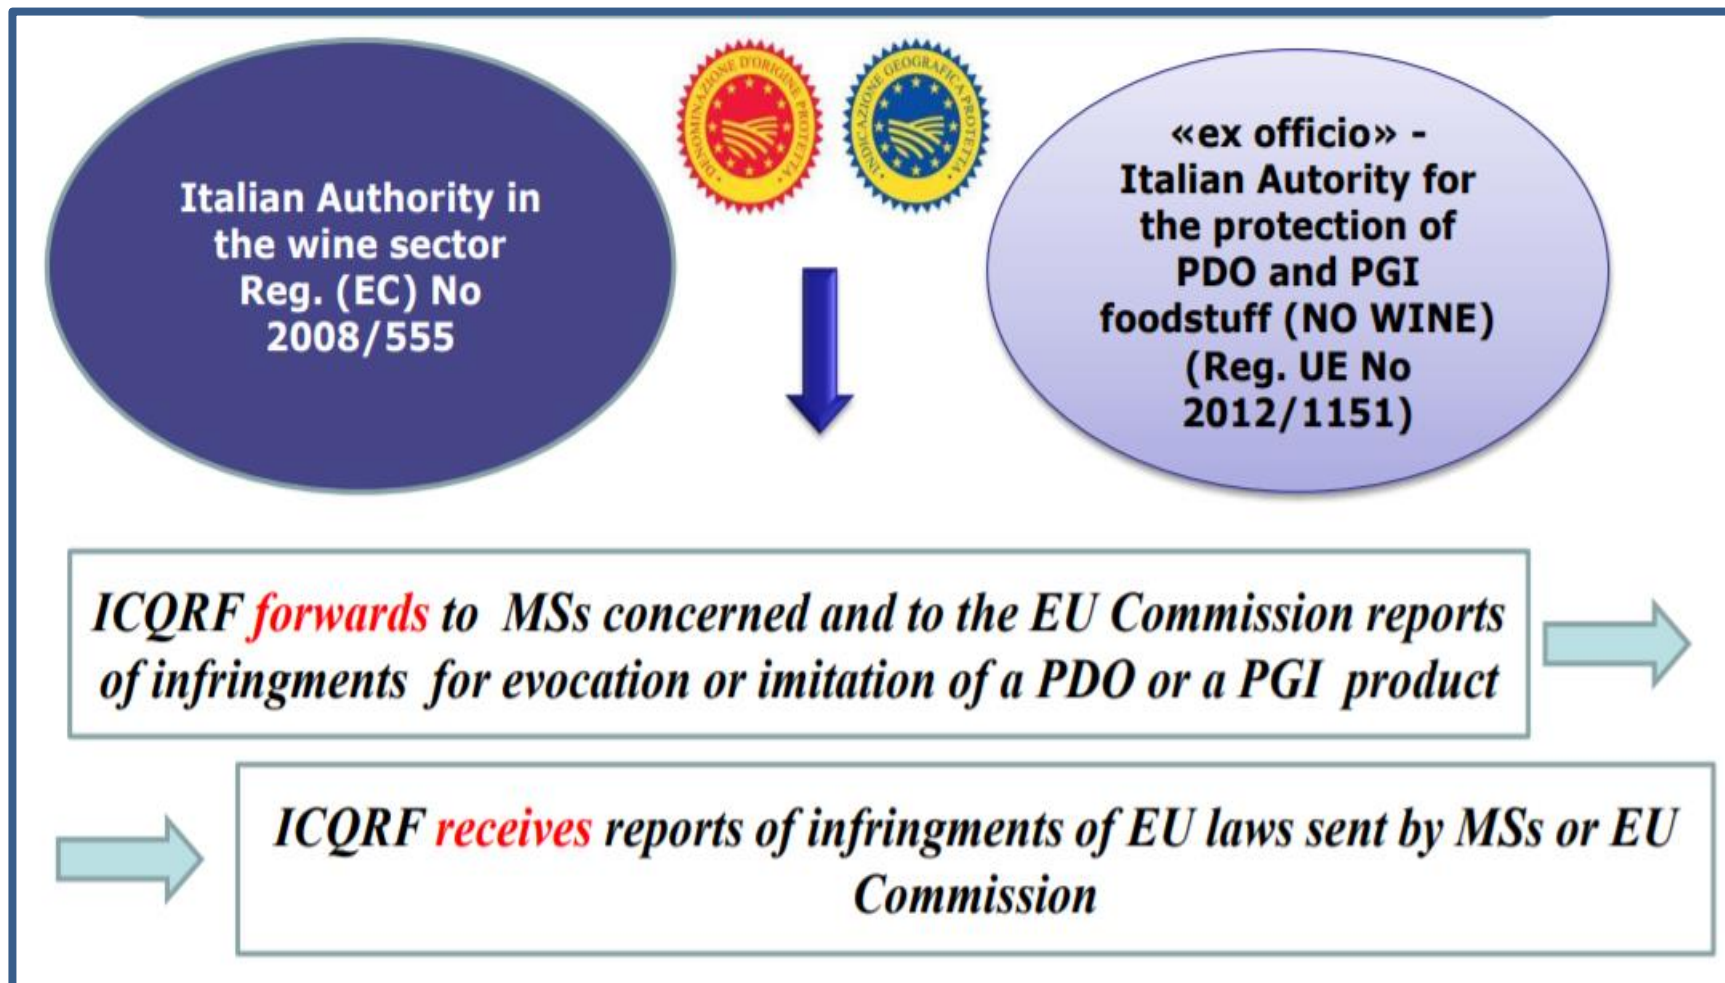

MAIN FACTS

- ✓ ICQRF is the Italian *ex officio* Enforcement Authority regarding the protection of PGIs and PDOs products
- ✓ The Italian Liaison Body in GIs wine sector.
- ✓ ICQRF is the National Authority, which takes measures to stop any unlawful use in Europe of the Italian PDO and protected PGI, in the Food and Wine sector.

IMPORTANT

On the Web, worldwide, ICQRF acts to protect the Italian PDO's and PGI's quality products, by means of cooperation with the main e-commerce player in the world. For several years, indeed, ICQRF has been operating on eBay, Alibaba and Amazon websites as Right Holder (owner) for protecting the “name” of the Italian Geographical Indications

Submit IPR

Submitted IPR

i Patent rights in utility models and design patents issued by the State Intellectual Property Office of the People's Republic of China(P.R.C.) are uncertain because only formalities are examined. In order to balance the legitimate interests of the rights holders with the commercial order on the platform, any infringement complaint based on utility model or design patent applied on or after January 1, 2010 of the P.R.C. must be submitted with a "Patent Evaluation Report" issued by the State Intellectual Property Office.

Note: Alibaba.com is only able to process an infringement claim after the relevant Intellectual Property Rights (IPR) details and documents are submitted and verified.

[*]Denotes a required field

IPR Details

*IPR Registration Number: Maximum of 50 characters.

*IPR Name/Description: Maximum of 100 characters.

*IPR Owner: Maximum of 50 characters.

*IPR Type: ☒ Trademark ☐ Copyright ☐ Invention Patent ☐ Design Patent ☐ Utility Model Patent ☐ Other

*IPR Registration Region: Hong Kong, Macau, Taiwan or Overseas

*IPR Validity Period: Select date Select date

Authorization Validity Period: Select date Select date

History

Identify and save alleged infringing listings to Pending Submissions

i Complaints can only be submitted after an IPR submission is verified.

*Please select one of the following options

Option 1: Search for alleged infringing listing by keyword

On the search results page, select alleged infringing products and click "Report"

Enter keyword:

Select Platform

Select Platform

www.1688.com

www.alibaba.com

www.aliexpress.com

Search

Option 2: Save alleged infringing listings in batches by pasting the URLs b

Please note the following when using the batch submission option:

- 1) There is a maximum of 200 listings per submission
- 2) Only product listings can be submitted
- 3) Each URL must be placed on a separate line
