1 - Introduction /// 简介

In France, GEVES is entrusted by the Community Plant Variety Office (CPVO) with responsibility for the technical examination of varieties of different species of hibiscus. /// 在法国，GEVES受欧盟植物品种局（CPVO）委托，负责各种木槿的品种技术审查。

This presentation will only deal with the species *Hibiscus syriacus L.* ///
本报告仅涉及木槿 (*Hibiscus syriacus L.*) 。

2 – Trial design /// 试种设计

The DUS exam follows the Technical Guideline TG/274/1, available on the UPOV website : /// DUS测试遵循技术指南TG/274/1, 可在UPOV网站上获得:

<https://www.upov.int/edocs/tgdocs/en/tg274.pdf>

It applies to all varieties of *Hibiscus syriacus L.* /// 该指南适用于木槿 (*Hibiscus syriacus L.*) 的所有品种。

The minimum duration of tests should normally be a single growing cycle. /// 测试周期至少应持续一个独立的生长周期。

Each test should be designed to result in a total of at least 8 plants /// 每次测试总共应当产生至少8个植株。

2 – Trial design /// 试种设计

In practice at GEVES /// GEVES现行做法

December
1st ///
12月1日

Application
deadline ///
申请截止日期

Feb.15th –
March 15th
/// 2月15日
– 3月15日

Plant Material
submission ///
植物材料提交

10 plants /// 10株
- container-grown ///
容器栽培
- able to show all their
characteristics during the
examination period. ///
能在测试期间展现出所
有性状。

Plant material must be
accompanied by a **Plant Passport**
or a **Phytosanitary Certificate**. It
must therefore be **free from pests**
as defined in regulation
2016/2031 on protective measures
against pests of plants and its
implementing acts for the species
to which the variety belongs. ///
植物材料必须附有植物护照或植物
检疫证书。凡是在欧盟关于植物病
虫害预防措施的第2016/2031号条例
以及该条例针对提交品种所属物种
的实施细则之中定义的病虫害，提
交的植物材料均不得携带。

2 – Trial design /// 试种设计

In practice at GEVES /// GEVES 的现行做法

December
1st ///

Litterature // 文献

...

**On the basis of the grouping characteristics ///
依据分组性状**

Feb.15th – March 15th
// 2月15日 – 3月15日

Plant Material
submission // **植物材料提交**

10 plants // 10株

- container-grown // 容器栽培

- able to show all their characteristics during the examination period. //能在测试期间展现出所有性状。

Present in the in-vivo reference collection
// 收录于活体参考品种集

Requested to growers/breeders/applicant
// 要求种植者/育种者/申请人提供

2 – Trial design /// 试种设计

Out of 10 plants received, 8 are planted outdoor, in open field for the DUS exam /// 收到10株植物，其中8株种植在室外，用于DUS测试

Plant material: healthy, vigorous /// **植物材料**:

健康，生长良好

No products that affect the natural development of plants (dwarfing, hormones, etc.). /// 不含影响植物自然生育的药剂（矮化剂、激素等）。

Irrigation: regular and systematic irrigation to ensure plants to settle and develop properly /// **灌溉**: 定期系统化灌溉，确保植株安定并正常生长

Fertilisation: reasoned, based on plant needs /// **施肥**: 根据植株需要合理施肥

Phytosanitary treatments: Reasoned protection will be carried out with approved products depending on the development of parasites or pathogens (local or global treatment). /// **植物检疫处理**: 根据虫害或病害的发展状况，使用经批准的药剂进行合理防治（局部或整体处理）。

Soil: as homogeneous a plot as possible to avoid experimental bias (attention paid to previous crops, soil preparation, etc.). ///

土壤: 尽可能确保地块土质均匀，避免实验偏差（注意前茬作物、整地等）。

3 – Assessing Uniformity /// 评估一致性

Article 8 of the 1991 UPOV convention: *The variety shall be deemed to be uniform if, subject to the variation that may be expected from the particular features of its propagation, it is sufficiently uniform in its relevant characteristics.* /// **UPOV公约（1991年文本）第8条：**一个品种从其繁殖的特点预期可能出现变异的情况下，如果其有关性状表达足够整齐一致，则该品种应被认为具有一致性。

Acceptance levels for uniformity are set according to the method of propagation /// 一致性的接受标准根据繁殖方法设定

Hibiscus → vegetatively propagated varieties ///

木槿 → 营养繁殖品种

the model used is the off type approach /// 采用异型株法判断

TG/247/1

For the assessment of uniformity, a population standard of 1% and an acceptance probability of at least 95% should be applied. In the case of a sample size of 8 plants, 1 off-type is allowed /// 一致性评估应采用1%的群体标准和至少95%的接受概率。如样本量为8株，则允许有1个异型株。

4 – Assessing Stability /// 评估稳定性

Article 9 of the 1991 UPOV convention: *The variety shall be deemed to be stable if its relevant characteristics remain unchanged after repeated propagation or, in the case of a particular cycle of propagation, at the end of each such cycle.* /// **UPOV公约第9条：**如果一个品种经过反复繁殖后，或者对于特定繁殖周期而言，在每个周期结束时，其相关性状保持不变，该品种应被认为具有稳定性。

TG/247/1

4.3.1 In practice, it is not usual to perform tests of stability that produce results as certain as those of the testing of distinctness and uniformity. However, experience has demonstrated that, for many types of variety, when a variety has been shown to be uniform, it can also be considered to be stable. /// 4.3.1 在实践中，开展稳定性测试得到的结果通常不会像特异性和一致性测试那样确定。但是经验表明，对许多类型的品种而言，如果某一品种显示出一致性，就可以认为该品种也具有稳定性。

4.3.2 Where appropriate, or in cases of doubt, stability may be further examined by testing a new plant stock to ensure that it exhibits the same characteristics as those shown by the initial material supplied. /// 4.3.2 有特殊情况或存在疑问时，可以再用新的植物材料进一步测试稳定性，确认其表现出的性状与最初提供的材料所展现的性状相同。

Funded by the European Union
受欧盟资助

5 – Assessing Distinctness /// 评估特异性

Article 7 of the 1991 UPOV convention: *The variety shall be deemed to be distinct if it is clearly distinguishable from any other variety whose existence is a matter of common knowledge at the time of the filing of the application. In particular, the filing of an application for the granting of a breeder' s right or for the entering of another variety in an official register of varieties, in any country, shall be deemed to render that other variety a matter of common knowledge from the date of the application, provided that the application leads to the granting of a breeder' s right or to the entering of the said other variety in the official register of varieties, as the case may be* /// **UPOV公约第7条：**如果一个品种明显有别于在申请书提交之时人所共知的任何其他品种，该品种应被认为具有特异性。特别是，凡在任何国家就另一品种提交育种者权利申请书的，或申请在正式的品种登记簿中予以登记的，只要由于该申请而获得育种者权利，或者该另一品种被登记在正式的品种登记簿中（具体视情况而定），应认为从申请之日起，该另一品种已为人所共知。

**Side-by side visual comparison in the growing trial ///
在试种期间“并排”目测比较**

6 – Observations of characteristics /// 性状观测

Observation of the UPOV characteristics from TG/247/1 /// 观测 UPOV 技术指南 TG/247/1 中列出的性状

Method of Observation: VG – MG – MS /// 观测方法: VG – MG – MS

M = Measurement : an objective observation against a calibrated, linear scale e.g. using a ruler, weighing scales, colorimeter, dates, counts /// **M = 测量**: 比照经过校准的线性量表进行客观测量, 例如使用直尺、称重秤、色度计、记录日期、计数

V = Visual observation : observations where the expert uses reference points (e.g. diagrams, example varieties, side-by-side comparison) or non-linear charts (e.g. color charts). /// **V = 目视观测**: 专家借助参照物 (如图表、标准品种、并排比较) 或非线性图表 (如比色卡) 进行观测。

Remark : “Visual” observation refers to the sensory observations of the expert and, therefore, also includes smell, taste and touch. /// 注: “目视” 观测是指专家通过感官进行观测, 因此也包括嗅觉、味觉和触觉。

G = Single record for a variety , or a group of plants or part of plants /// **G = 测量或目测某一品种, 或者一组植株或植株部位后得到的单个记录**

S = records for a number of **SINGLE**, individual **plants** or parts of plants /// **S = 分别测量或目测一定数量的植株或植株部位后得到的多个记录**

France

UPOV REPORT ON TECHNICAL EXAMINATION

1. Reference number of reporting authority : **4067790**
2. Requesting authority : Office Communautaire des Variétés Végétales
3. Address of requesting authority : 201920 Angers France minsyrou17
4. Breeder's reference : 20/08/2019
5. Date of application in requesting State : HORTITAL DIFFUSION SAS 25 rue Les Fontaines de l'Anjou Beaufort en Vallée 49250 BEAUFORT EN ANJOU France
6. Applicant (name and address) : HORTITAL DIFFUSION SAS 25 rue Les Fontaines de l'Anjou Beaufort en Vallée 49250 BEAUFORT EN ANJOU France
7. Botanical name of taxon : Hibiscus syriacus L.
8. Common name of taxon : Hibiscus
9. Variety denomination : MINSYROU17
10. Breeder (name and address) : (if different from applicant) GEVES (France)
11. Testing authority : Bron (49)
12. Period of testing : 2020
13. Date and place of issue of document : Beaufort-en-Vallée, Thursday, March 25, 2021

RESULTS OF THE TECHNICAL EXAMINATION AND CONCLUSIONS

(a) Report on Distinctness :

- The variety
 - is clearly distinguishable from any other varieties
 - is not clearly distinguishable from all varieties
 whose existence is known to us

(b) Report on Homogeneity :

- The variety
 - is sufficiently homogeneous
 - is not sufficiently homogeneous
 having regard to the particular features of its sexual reproduction or vegetative propagation.

(c) Report on Stability :

- The variety
 - is stable
 - is not stable
 in its essential characteristics.

In the case of a positive conclusion, a description of the variety is given as annex to this report.
